- **Pole Top Extensions**

HDPE PRODUCTS

- **Round Body**
- **Rectangular Body**
- **Splice Box and Pedestal**
- **HDPE - Transformer Pad**

HIGHLINE PRODUCTS, MANUFACTURER OF ELECTRICAL UTILITIES DISTRIBUTION EQUIPMENT

About Highline Products

Since 1967, Highline Products has served the electric utility industry throughout the United States and Canada by manufacturing a complete line of electrical distribution products including fiberglass transformer box pads, switchgear pads and pole-top extensions.

Over the past five years, we have progressively broadened our line of electrical utility distribution products, which has resulted in our continued success and expanded customer base. In addition to our time-tested and field-proven products, we have added a variety of distribution and underground electrical utility enclosures such as HDPE splice boxes/pull boxes, polymer concrete underground vaults, handholes, pads, and fiberglass sectionalizing cabinets.

Highline manufactures top-rated electrical utilities distribution equipment used by:

- **Electrical Commercial/Industrial and Fiber Contractors**
- **Electrical Utilities**
- **Outside plant operators, including telephone utilities, long distance carriers, FTTH (Fiber to the Home)**
- **CATV MSO's (Multiple Systems Operators) and local systems**
- **Department of Transportation (DOT)**
- **Waterworks utilities and contractors**

With an eye to the future, we continue to search for new ways to service our customers. We are meeting that commitment by continuing to develop new and innovative utility products, as well as with a customer service initiative that will continue our 100% customer satisfaction guarantee.
